AMENDED IN ASSEMBLY JUNE 21, 2010

CALIFORNIA LEGISLATURE—2009–10 REGULAR SESSION

House Resolution

No. 31

Introduced by Assembly Member Eng

June 10, 2010

House Resolution No. 31—Relative to the Legislative Task Force on Chronic Kidney Disease.

1 WHEREAS, Kidney disease is the ninth leading cause of death
2 in the United States; and
3 WHEREAS, One out of every eight Americans, more than 26
4 million individuals, suffers from disease of the kidney and urinary
5 tract; and
6 WHEREAS, Presently more than 85,000 patients nationwide
7 are waiting for kidney transplants. Yet, there is a critical shortage
8 of organ donors. Only half of those waiting for a life-saving
9 transplant will receive one; and
10 WHEREAS, Twenty percent of all Americans suffering from
11 chronic renal failure might have prevented their disease had they
12 followed recommendations for treatment of high blood pressure;
13 and
14 WHEREAS, African Americans between 30 and 49 years of
15 age develop kidney failure related to high blood pressure eight
16 times more often than Caucasians of the same age range; and
17 WHEREAS, The number of diagnoses of those with a form of
18 chronic kidney disease (CKD) is rising, including persons with
19 seriously reduced kidney function that may progress to end stage
20 renal disease (ESRD), requiring kidney dialysis or a kidney

1 transplant. ESRD is usually the result of years of CKD, the primary
2 causes of which are diabetes, high blood pressure, or a family
3 history of CKD; and

4 WHEREAS, Recognizing that the treatment of CKD is a
5 tremendous expense and that the early diagnosis and effective
6 treatment of CKD can prolong lives and delay high-cost medical
7 treatment, including dialysis or transplantation, and that there are
8 existing, cost-effective laboratory tests that can assist in the early
9 diagnosis of CKD, it is necessary to establish a Legislative Task
10 Force on Chronic Kidney Disease; now, therefore, be it
